Chapter 26

WILDLIFE ACT

The Commissioner of Nunavut, by and with the advice and consent of the Legislative Assembly, enacts as follows:

PART I

GENERAL PROVISIONS

Purpose, Values and Principles

Purpose of this Act

1. (1) The purpose of this Act is to establish a comprehensive regime for the management of wildlife and habitat in Nunavut, including the conservation, protection and recovery of species at risk, in a manner that implements provisions of the *Nunavut Land Claims Agreement* respecting wildlife, habitat and the rights of Inuit in relation to wildlife and habitat.

Values

- (2) To fulfill its purpose, this Act is intended to uphold the following values:
- (a) wildlife and habitat should be managed comprehensively since humans, animals and plants in Nunavut are all inter-connected;
 - (b) to be comprehensive, the management of wildlife and habitat should include research, analysis, education, harvesting, regulation, conservation, protection, restoration and revitalization;
 - (c) Inuit are traditional and current users of wildlife and their rights under the *Nunavut Land Claims Agreement* in relation to wildlife and habitat, which flow from that use, should be given full force and effect;
 - (d) the management of wildlife and habitat and the exercise of Inuit harvesting rights should be governed by and subject to the conservation principles;
 - (e) the precautionary principle should govern decision making under this Act;
 - (f) the guiding principles and concepts of Inuit Qaujimajatuqangit are important to the management of wildlife and habitat and should be described and made an integral part of this Act;
 - (g) certain provisions of the *Nunavut Land Claims Agreement* respecting wildlife, habitat and the rights of Inuit in relation to wildlife and habitat should be included in this Act to provide Nunavummiut with greater certainty and understanding;
 - (h) all wildlife and habitat should be recognized as intrinsically valuable and worth more than just the benefits derived from harvesting and commercial activities;

- (i) the biological diversity of Nunavut should be maintained and wildlife resources should be used in a sustainable manner;
- (j) the management of wildlife and habitat should provide optimum protection to the renewable resource economy;
- (k) no species in Nunavut should be allowed to become extinct or extirpated as a consequence of human activities;
- (l) the Nunavut Wildlife Management Board, as the main instrument of wildlife management in the Nunavut Settlement Area, should be enabled and empowered to fulfill its responsibilities;
- (m) wildlife management should be an effective system that complements Inuit harvesting rights and priorities, recognizes Inuit systems of wildlife management that contribute to the conservation of wildlife and protection of habitat, and recognizes the need for an effective role for Inuit in all aspects of wildlife management;
- (n) RWOs and HTOs should play an important role in wildlife management; and
- (o) the Government of Nunavut, which retains ultimate responsibility for wildlife management in Nunavut, should be enabled and empowered to fulfill its responsibilities.

Conservation principles

(3) The following conservation principles apply under this Act:

- (a) the maintenance of the natural balance of ecological systems;
- (b) the protection of habitat;
- (c) the maintenance of vital, healthy, wildlife populations capable of sustaining harvesting; and
- (d) the restoration and revitalization of depleted populations of wildlife and their habitat.

- (c) *Ajiiqatigiingniq/Pitiakatigiiklotik*, which means that people who wish to resolve important matters or any differences of interest must treat each other with respect and discuss them in a

- meaningful way, keeping in mind that just because a person is silent does not necessarily mean he or she agrees;

Papattiniq/Munakhinik

(2) Although the principle of *Papattiniq/Munakhinik* traditionally applied to objects rather than to living things, because the Government of Nunavut and the NWMB have responsibilities to conserve wildlife, they must endeavour to apply the principle of *Papattiniq/Munakhinik* to wildlife and habitat and conserve these resources for future generations of Nunavummiut.

Aajiiqatigiingniq/Pitiakatigiiklotik

(3) Where meetings, discussions or consultations take place under this Act, the parties in attendance must use their best efforts to follow the principle of *Aajiiqatigiingniq/Pitiakatigiiklotik* and remember that a person's silence does not necessarily mean agreement, unless it is made clear to him or her that silence will be assumed to be acceptance or agreement.

Pilimmaksarniq/Ayoikyumikatakhimanik

(4) The Government of Nunavut, the NWMB, every RWO and HTO, every conservation officer and wildlife guardian and every person harvesting wildlife must use their best efforts to follow the principle of *Pilimmaksarniq/Ayoikyumikatakhimanik* when performing their various functions and activities.

Piliriqatigiingniq/Havakatigiiklutik

(5) The Government of Nunavut, the NWMB, every RWO and HTO, every conservation officer and wildlife guardian and Nunavummiut must use their best efforts to follow the principle of *Piliriqatigiingniq/Havakatigiiklutik* to fulfill the purpose, values and principles of this Act.
